# Filtrex Automotive

Automated particle and fiber counting Mechanical parts cleanliness analysis

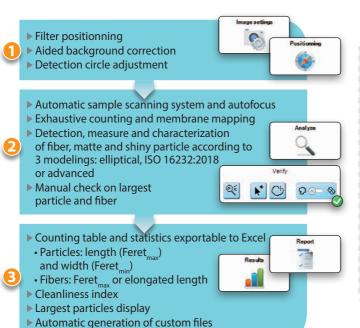

Filtrex Automotive is a turnkey system, dedicated to automated analysis of mechanical parts particle contamination, in the automotive industry:

- Routine analysis
- Cleanliness of: ball bearing, conrod, piston, crankshaft, injector, toothed wheels...

- 3 -step automated analysis
- Fully compliant with automotive industry standards: ISO 16232, ISO 16232:2018, VDA 19
- Matte and shiny particle counting, fiber measurement
- Polarized camera for increased detection efficiency
- Secured by 2 access levels: administrator and operator
- Modular and upgradeable turnkey system

### With Filtrex Automotive, perform your automatic cleanliness analysis in 3 steps:

## Parameters protected by administrator level:

- Source selection: scanner, microscope...
- Membrane diameter
   & scan area
- Advanced image settings
- Advanced detection settings
- ▶ Report settings

Filtrex

## Filtrex Automotive, the Filtrex routine system

for your LIMS - on demand

	·	Automotive	Filtrex
Mechanical parts cleanliness analysis		•	•
Cleanliness analysis of: fluids, powders, pharmaceutical parts		-	•
Standards compliance	VDA 19, ISO 16232, ISO 16232:2018	•	٠
	ISO 4406	-	٠
	USP 788	-	•
	NF L41-101	-	•
	User-defined standards	-	٠
Automated analysis		•	•
Programmable analysis		•	-
Analysis templates		•	•
Free "varieties" setting: fiber, particle		(1)	•
Free customization of counting tables		(2)	•
Full customization of classes, Cleanliness Code specification		(3)	•

(1) - "Varieties" (fiber, particle) as defined by ISO 16232, ISO 16232:2018 and VDA 19

(2) - Tables set out by VDA and ISO standards

(3) - Fixed classes - as defined by the standards, may be combined - direct CCC entry available
